IL-600 EM with safety lighting function

Emergency lighting is often forgotten until an accident or power failure happens. In the past it has been fires, today other threats can be far more sinister and this highlights the need for emergency lighting.

IL-600 EM lamps feature MICA EM -emergency light operation. During a power failure, a MICA lamp with EM function will light up and provide light for the area in front of it. The lamp automatically turns off when returned to the charger and/or the power returns. In addition to this special function, rechargeable MICA EM lights can be used normally as an professional flashlight.

MICA IL-600 EM:
The extremely robust all-round lamp with three ultra-bright LED and EM-function.

Product number:

NiMH battery model 13700
NiCd battery model 13710

Lumens: High 500 Lumens
Low 120 Lumens

Ingress Protection:
IP 66/67
Polyamide shockproof & waterproof

Battery Duration with NiMH Battery:
High power 8 Hours
Low power 24 Hours

Chargers: MICA ILC-3 and MICA CR multi-station chargers. Input 85...264VAC, 47...63Hz.
Chargers are extremely rugged and constructed of aluminium.

More details from separate datasheets.

MICA IL-600 EM & ILC VAC installed to storage wall. During power failure it illuminates the area in front of it

Effective emergency lighting is used to protect property in stores, secure safety of machinery and illuminate passageways. MICA EM lights are used in airports, harbors, public facilities, factories, military installations, power plants etc. i.e. in places where high standard emergency lighting is needed.

MICA lamps are designed and manufactured in Finland by Mica Elektro Oy Ltd.
