

In this issue of **MICA NEWS** we proudly present the new **MICA IL-800 Zone 0 and Zone 1.**

3 x Ultra-Bright CREE LED

High-Power safety lamp for Zone 0

Brand new IECEx/ATEX -approved MICA IL-800 sets the new standard for explosion proof portable lighting. Available for Zone 0 (21) and Zone 1 (22). Certified by TÜV Rheinland. Supreme quality is guaranteed by ISO 9001:2008 compliant quality system and specially to Zone 0 certified manufacturing process.

The shock resistant body is manufactured completely of antistatic plastic and its enclosure class is IP67. The most advanced and robust design secures the safest hand lamp in the market - MICA Strongest in the market!

New IL-800 is compatible with MICA ILC-3 chargers. It is available with Blink-mode and original MICA EM-function (during power-failure, the flashlight will automatically illuminate area in front of it). The electronics warn the user of low battery charge by flashing the light beam when there is 20-30 minutes of operating time left. All models are supplied with carrying straps.

Main fields of use: True all around lamp! Especially explosion hazardous areas, oil & gas industry, chemical industry plants, fire fighting, military, service & repair personnel, industrial emergency ligh...

MICA IL-800 Zone 0 & IL-800 Zone 1 are in stock now! Please don't hesitate to ask for more information!
